Skills and tools:

 HTML

 CSS

 Javascript

 Figma

 React

 Next.js

 Tailwind css

 SASS

 Git

 Photoshop

 XD

 Redux

 Styled Components

 Woocommerce

 Wordpress

 Supabase

 Web3.js

My Projects:

ExtraHex

ExtraHex is an innovative, design-focused alternative to Hex.com that aims to enhance user experience by providing an intuitive and visually appealing interface. Leveraging **Next.js** and **Web3.js** technologies, ExtraHex allows users to seamlessly interact with the Hex smart contract on both the **Ethereum** and **PulseChain** Blockchain. The platform offers a comprehensive dashboard for users to efficiently manage and monitor their stakes, ensuring a streamlined and enjoyable staking experience.

- Build with **NEXT.js 13 and Typescript**
- Styling done with **Tailwind css**
- Allows users to interact with the Ethereum and Pulsechain blockchain on a dashbord using **Web3.js**

extrahex.com
<https://github.com/Matsfjeldstad/Extrahex>

Mintra

Fictional Ecommerce/auction-site.

- Buildt using **HTML, CSS** and **Javascript**
- Fetching product info from custom **noroff api**.
- Using **Javascript** and **API** to filter products.

This project was used as an exam in the semester project 2 at Noroff for the 3 semester.
Grade: **A**

Offical site for The Golden Egg Awards

Lead Front End Dev on the website for the Golden Egg Award show, an award show for students at Noroff School of Technology and Digital Media. This is a cross-studies project, where the graphic design class and the ux-design class made the web design, and me and a group of 5 other front end students did the development part. Page was used students from all 4 Noroff campuses in Norway.

- Managing project using **Git, SourceTree** and **Jira** using agile sprints.
- Build with **Vite, React and Tailwind**
- Integrated ticket and nomation system for the event.

Holidaze, Project exam at Noroff

Holidaze is a project I developed as my final exam at Noroff. It's a fictional booking site for reserving holiday venues and homes. Built using **Vite, React, Tailwind**, and **Redux** for the frontend, while using **Supabase** for the backend. I utilized **RTK Query** to cache API calls from Supabase and **Mapbox** to display houses on the map. The admin dashboard includes tables for managing bookings and venues, as well as graphs to check venue income. This project blends modern web development tools to deliver an efficient and user-friendly experience.

Grade: **A**

Education:

2021-2023 Front End Development

Through a rigorous two-year study in Frontend Development, I've garnered a profound understanding of key areas in web technology. My education began with the basics, exploring HTML, CSS, and JavaScript alongside courses in Design, Web and Communication Technologies, and Project Methodology. Furthering my knowledge, I focused on specialized areas like Interaction Design and Content Management Systems. The subsequent year honed my skills in advanced topics such as CSS Frameworks, advanced JavaScript, Development Platforms, and industry-specific knowledge. An integral part of my curriculum was learning workflow management and familiarizing myself with JavaScript frameworks to build efficient and robust web applications. My education has thus shaped me into a competent and versatile Frontend Developer.

Noroff school of technology and digital media

2018-2020 Pedagogy

Høgskolen i Innlandet

Work experience

2019- Jesting Sport AS

Employed as a Retail Seller at Jesting Sport AS, a renowned ski and fishing equipment store, I managed inventory, helped customers make informed purchasing decisions, and ensured a pleasant store environment. In addition to retail responsibilities, I maintained their WordPress and WooCommerce pages, blending my frontend development skills with a practical business setting.

2019- FUS Barnehagene

At FUS Barnehagene, as a Kindergarten Assistant, I played a pivotal role in promoting a positive, educational, and fun environment for children. I assisted in crafting educational activities, guided children in their daily tasks, and managed classroom dynamics. This role helped me develop strong skills in child care, patience, and effective communication.

2018-2019 Namsskoganbygg AS

At Namsskoganbygg AS, a retailer specializing in building supplies, I assisted customers in making informed purchasing decisions for their construction projects. I gained an in-depth knowledge of diverse construction materials and tools, and developed a proficiency in sales and customer service. This role required a keen understanding of product specifics and a strong ability to translate customer needs into practical solutions, skills that I honed over my time at the company.

2018-2019 Coop Marked Namsskogan

In my role at Coop Marked Namsskogan, I was responsible for managing the beverage department of this bustling grocery store. My duties ranged from stocking and inventory management to providing excellent customer service. Interacting with diverse clients broadened my communication skills while rigorous organization of products deepened my understanding of retail operations
